Program Overview:

Lean is about organizational transformational towards operational excellence. If your organization strategy addresses operational and organizational excellence, this course will be of great value to you. In this course you will discover how to develop Lean Strategy, objectives and explore the world of Lean tools. Further, it will discuss how to embark on a Lean journey in your organization.

For Whom:

This program is designed for all professionals who are involved in hands-on initiatives focusing on operations excellence and improving speed, as well as those who are responsible for linking, measuring and improving the performance of the organization.

Learning Objectives:

At the end of the program, participants will be able to:

- define and explain lean concepts and its importance for organizations;
- identify typical process waste in organizations and the importance of removing such waste for organization's profits, competitive edge, and customer satisfaction;
- recognize how lean concepts can directly address the elimination/reduction of operating costs, cycle time, and non-value-added activities;
- develop an effective lean implementation plan; and
- apply lean implementation methodologies.
