

RESULT BASED MANAGEMENT WORKSHOP

DESCRIPTION

This workshop highlights the extent to which the implementation of RBM techniques has an impact on business practices. It demonstrates how RBM contributes to national efforts for achieving development results, supports the implementation of a common framework for inter-agency collaboration, and shapes countries' approaches to programmed design, implementation and management for results in development.

OBJECTIVES

- *Understand the theory of change and strategic results framework
- *Risk register
- *Integrated monitoring and evaluation
- *The use of evidence from monitoring and evaluation in decision-making
- *Meaningful reporting to key stakeholders.
- *Devise metrics to monitor and control project risks
